Get Off the Worry-Go-Round

OVER HALF CENTURY OF SERVICE WHERE NEEDED THURSDAY, APRIL 16, 1959

The Smartest Dog

The question is often asked: "What is the smartest breed among dogs?" If you think you know the answer, and you think you have the smartest dog in existence, you may be right. No breed, as a breed, produces all of the smartest dogs. A canine expert, once queried on this subject, said that the intelligence of a dog, or any animal, depended upon the individual animal itself. In the case of dogs, he had a word of advice which we would like to pass on.

The smartest dogs, according to this gentleman, are those who have the benefit of human companionship and who are allowed to associate with humans, or the family to which they belong.

There are breeds which are brain better than others, and there are breeds which are smart in different ways from other breeds. However, a dog does not have to be a pedigreed animal to be smart. Experts say that many of the smartest dogs are not pedigreed.

The best advice, then, if you would have a smart dog, is to give him a chance to associate with the family. Dogs that are shut up or chained in a yard seldom develop likeable personalities, or have a fair chance to become "smart" animals.

Charity Begins At Home

This community, through its many organizations, and just about everyone in the United States, is constantly being asked to donate packages, money and other things of value for overseas projects. We are asked to build a hospital in a corner of Asia, or contribute to the refugees in another part of the world, etc.

We are told, in meetings of established Christian-principled organizations, including charitable organizations in many cases, that it will take \$250,000 to complete this building in Korea, or another \$100,000 to finish a certain home for refugees, or orphans, in some other part of the world.

All these projects are well and good, and we do not criticize any of them. The point is, however, that we are constantly in need of such generosity and charity, at home. There are orphans and refugees in the United States by the hundreds of thousands. There are needy families, many dying of incurable diseases without sufficient funds for medical attention, and many families who do not get enough to eat.

Most Americans have a generous nature, and an emotional appeal about the unclothed, underprivileged, underfed, or refugee children (particularly children) in some far-away land stimulates a desire to give. This is a commendable desire, and the reaction is one.

Nevertheless, if this money were put to use nearer home, in our own country, or state, or even in our local community, much could be accomplished—and we would have concrete proof of what we have been accomplishing, and see the results for ourselves.

In addition, we would escape much of the cost of huge national and international charitable organizations, which sometimes become over-organized, and which rarely go out of business once they have set up a national or international office and the appropriate number of office-holders.

Books And You

It is a pity, we often think, that the American people are so enthralled by low and cheap sex novels, while the majority appear to read very little that is worth-while. A large segment of the population even seems to prefer sensational-type magazines, and newspapers, to responsible ones, which seek to print a fair selection of the news, impartially.

In view of the tremendous progress being made in Russia, in the field of education, science, music, the theater and other related fields, it behooves every American to try to do something to improve his mind, his thinking process and his appreciation of the better things of life. There is no denying that, in these fields, the Russian people are making tremendous progress and even more, we might as well admit that they are outstripping us in many of the arts.

The American people have long been considered somewhat rough, or pioneer, to the European continental, as far as the arts and the appreciation of the arts is concerned. The Russians, for generations, have been considered a rougher, more primitive, although they have been known for their musical talents for generations. The United States has been known as the leading industrial power of the world, and this has saved us, in democracy, in past crises, from being reduced by Russia, and we cannot use this lead as an excuse for not making progress in the field of culture.

Therefore, we earnestly suggest that every reader consider devoting some part of his time to reading, in an effort to increase his appreciation of the better things of life. The strength of our country in the past has been the average Christian citizen, and the strong family concepts are threatened by today's over-emphasis on sex, cheap novels, cheap pictures and television programs, and the washed-out, or the children of this country, continually stressed to the children of this country.

Today's MEDITATION

Devotional Guide

The Upper Room
THURSDAY, APRIL 16

Read—Acts 2:37-42

You shall receive the gift of the Holy Spirit. (Acts 2:38)

One day I was walking across the famous Boston Common and was somewhat surprised to see a building with this sign—"Holy Ghost Chapel—Air Conditioned—For Rent."

This temporary chapel had been abandoned for a more magnificent one elsewhere. Nevertheless, the abandoned chapel was to be a vivid expression of the attitude of our generation toward the Holy Spirit.

Too often in our times we have left empty the place which the power and presence of the Holy Spirit ought to occupy in our lives and in the life of the church. Pentecost ought to be a major Christian festival in the church.

Nothing would be more fruitful for these days than a thoughtful recovery of the experience and power of God's indwelling Spirit. How much needed it is if we were to carry out God's will and way for this generation!

PRAYER

"Come, Holy Spirit, come! Come as the fire and burnt offering as the water and cleanser! Come as the wind and refresh! Convince, convert, and consecrate my heart and will to my great good and to Thy greater glory." In the name of Christ. Amen.

THOUGHT FOR THE DAY

"We cannot go forward unless we go deeper in spiritual empowerment and dedication."

Clarence F. Avey (Mass.)

World-wide Bible Reading: 1 Samuel 14:16-35

It is often easier to say something bad about a person than something good and it is the time to say nothing.

BACKWARD LOOK...

TEN YEARS AGO

Bulloch Times April 14, 1949

R. P. Mikell was named general chairman for the local fair show and sale by the Bulloch County livestock committee Friday afternoon.

That was a forceful and informative address made by Everett Williams before the members of the Statesboro Rotary Club at the Monday luncheon hour concerning the forthcoming bond election for school betterment.

The back-firing of a Diesel engine which furnished power to the plant, caused damage estimated at approximately \$40,000 in the Darby Lumber Company.

For ten years, the fire department and volunteers battled to subdue the flames.

PORTY YEARS AGO

Bulloch Times April 10, 1919

Porty Years Ago, the Hagaz district, returned home from overseas duty in the army.

DeLoach and Deputy J. M. Mitchell brought in a 60-gallon still captured on a farm near the town of Statesboro.

M. M. Barrett, former resident of Statesboro, now of Rochester, corrects record of the coast of England.

L. T. Bartlett, who has been a resident of Statesboro for many years, will leave during the week for Dumbarton, Okla., to engage in mercantile business.

Rafel L. Best, a young white man, was fined \$100 or nine months on the chain gang upon entering plea of guilty to the abduction of his family in city court.

FIFTY YEARS AGO

Bulloch Times April 14, 1909

Morgan & Addison purchased the machine shown on the cover of the Atlanta edition.

A formal inspection of the local military company, the Georgia Army National Guard, was held on the evening of April 7, 1909, at 7 o'clock, followed later by a supper at the Kushing Hotel.

The Georgia Army National Guard was in charge of the program.

THIRTY YEARS AGO

Bulloch Times April 11, 1929

Adjutant General Homes C. Parker, of Atlanta, was a visitor in Statesboro while enroute to Savannah.

Reeves Lewis of Statesboro has been elected secretary-treasurer of the Junior law class at Mercer.

Miss Nita Franklin and Jack W. Denmark were married Monday

night at the home of the bride's parents, Mr. and Mrs. J. W. Frank.

Mrs. J. D. Paul, age 47, was a member of the local fair show and sale by the Bulloch County livestock committee Friday afternoon.

PORTY YEARS AGO

The Wheels Go 'Round

A real "wheel" in action. If he doesn't calm down, he'll explode one of these days.

Of course you'll see few men with four wheels on their heads. It's just a figure of speech. This one is a bit more literal.

If you doubt that this way of living is a disaster, just read ordinary notices for a few days. You'll be shocked to learn how many young men die from sudden heart attacks. Doesn't make much sense, does it?

But do we really forgive if we don't forget? Do we sincerely want to forget?

I think that we mortals rather enjoy being martyrs; like pitying ourselves; find a sadistic pleasure in recalling unhappy incidents and fish quicker and get him out on the bank without such a struggle.

For fishing has been reported by poor from all reports of the past week, however, with this hot weather you can surely count on some good fishing for the coming weeks. They are taking a few blue gills on crickets and worms and all kinds of fish, and they are catching good heavy perch, bass, cat and warmouth. All you need is a good case pole about twenty to fifteen feet, a ten or twelve pound test line, one or two BB shot, a float and a No. 6 Aberdeen hook to forget.

For creek fishing always cut your line about two or three feet shorter than you pole. You can get your line in the water and fish quicker and get him out on the bank without such a struggle.

Let's Live Today

DO WE REALLY FORGIVE?

You often hear people say: "I have forgiven, but I'll never forget." Indians, elephants, dogs and other wild creatures feel the same way.

But do we really forgive if we don't forget? Do we sincerely want to forget?

I think that we mortals rather enjoy being martyrs; like pitying ourselves; find a sadistic pleasure in recalling unhappy incidents and fish quicker and get him out on the bank without such a struggle.

For fishing has been reported by poor from all reports of the past week, however, with this hot weather you can surely count on some good fishing for the coming weeks. ranger may have help in making the arrangement. (7) What flowers, foliage, fruit, or vegetable are allowed in the class. (8) Time container, period, kind of arrangement, color, and harmony required by schedule. (9) Conservation laws. (10) If wiring is permitted. (11) Judge's fee for: (1) Good grooming. (2) Carefully planned exhibits, specimens and arrangements. (3) Appropriateness. (4) Distinction and originality. (5) Knowledge and use of good cultural practices. (6) Well conditioned, carefully planned and original. (7) The spiritual concept in an arrangement. (8) The principals of design and a wise use of color.

Arrangement - Implicates the artistic use of fresh plant material for displays or flower arrangements, with elements assembled placed according to the principals of design.

Composition - A flower arrangement with one or more accessories. Accessories - Anything that is used in a flower arrangement, such as a container, base, or fabric under the container. Examples - cut foliage, background, fabric, books and figurines.

Design - Is the plan, form and shape of a composition. "Beauty of style and harmony and grace and good rhythm demand simplicity." PLATO - 427-347 B. C.

ITALIAN MANUFACTURER VISITS ROCKWELL PL

In The Land Of Pyramids

By Dr. Guy Wells

I mailed a brief account of our world tour that we had made as far as Istanbul since landing in Turkey eight days ago. We have visited for one or more days Athens, Greece, Beirut, Lebanon, Jerusalem, Jordan and Cairo, Egypt. All of these trips were made by plane—a distance of approximately 4,000 miles. We are now going through the Suez Canal and are half way through, waiting at a passing place to pass before proceeding on to Port Suez.

The past two nights and the better part of three days we have spent in Egypt, Cairo and Alexandria. In Cairo we stayed at the M. Hotel next to the famous Cheops pyramid. It would require many days to see all that should be seen in Egypt. This ancient African country has long been a delight for tourists and centuries before many countries were discovered, people were coming to this ancient land.

The Nile valley was the birth place of civilization. The pyramids were a source of wonder even in Biblical times. The story of Egyptian civilization is a long one. In Cairo we visited the pyramids, the Sphinx, four famous mosques and the world noted Egyptian Museum, containing the relics from King Tut's tomb.

There is nothing like the old king in the world. It requires most of one large floor of the museum to hold the things taken from this tomb in Luxor. In 1951 I visited Cairo and saw the mummy of King Tut. It has since been taken back to Luxor, where he ruled and was buried 3300 years before Christ.

The three coffins in which the mummy was buried are exhibited in the museum. The first coffin is solid gold and the second is covered by gold. These three coffins were enclosed in three large boxes gilded in gold. One box inside the other and coffin inside the coffin.

The beds he used, the chairs, the clothes, everything he must have used in the palace were buried with him—his crown, his throne, his chariots, even his rabbit foot, his chess, his finger bowls, his dishes, his food. It is almost beyond the imagination of man to conceive all that this tomb portrays about the early civilization in Egypt.

First of all, the king believed in an after life. The arts were highly developed for the vases, the jewelry would compare favorably with present day arts.

We saw several palaces of the late King Farouk, palaces that cost millions of dollars. One is in the desert with the wealth of the few and the poverty of the many.

There are 25,000,000 people in Egypt and most of the land and wealth are centered in the hands of a very few people—25,000,000 people live in a narrow strip of land a few miles wide on each side of the Nile. There were beggars on every street and road.

Cairo has a population of 3,000,000 and Alexandria about 1,500,000. Egypt is inter-changed with the Holy Land. The children of Israel resided here for centuries and must have learned much from these ancient people about religion and law and politics. The place which the Bible tied up with the Holy Land is pointed out. The tree under which Joseph and Mary rested when they escaped to Egypt with the child Jesus is pointed out.

The city of Cairo contains hundreds of mosques and Christian churches and two great universities—one the American University in Cairo.

The people as a whole were friendly and we had no trouble except to feel sorry for the many beggars and poor roaming the streets and highways.

Next time I will write about Lebanon.

AN UNDERESTIMATE

That a million dollars worth of gum is chewed weekly in the United States looks like an underestimate, no doubt, to the movie-house janitor. —The Western (Ore.) Leader.

Spring Is Clean-up Time On Farm

(By Roy Powell, County Agent)
Spring is officially here now—a good time to spruce up your tractor and other farm machinery for safety's sake. Getting all your farm machinery in good repair not only makes it work better, it also insures safer operation.

Time, or make time, now to safely check your farm tractor. Make certain that it starts easily. You may need a new battery or set of points or spark plugs for it. Check the tires for cuts or bad bruises and have bad tires repaired or replaced.

A steam cleaning of the entire tractor may prevent a serious fire. Is the sediment bulb of the metal or pyrex type? A small investment in a fire prevention sediment bulb is a wise investment.

Is there an approved fire extinguisher on your tractor? The answer to your question is yes or no. When you are spring cleaning your tractor and other farm machinery is a mighty good time to clean up your machinery storage places, too. Clean up all litter and pick up objects lying around that you may trip over. Clean out all tool boxes and get rid of the collection of grease rags. Remember, when you work for safety, safety works for you.

LOAFING COWS
Chances are good that you keep your tractor in good repair at all times for few farmers will put up with a tractor that's hitting on only half its cylinders. Yet many dairy farmers keep milk cows that are not producing half what they should.

Your tractor usually coughs and sputters or otherwise indicates it isn't on its best behavior when the engine isn't running right. Not so with milk cows. A cow that is not producing enough to pay for her feed bill may look as smooth and pretty as the best milker in the herd.

What can a dairyman do to make sure he isn't stuck with a bunch of such loafers? The answer is systematic culling. The only way a dairyman can cull accurately is by keeping records on each cow in the herd. You certainly can't judge milk production

by looking at a cow. Most dairy herds have a few cows that are not paying their way. Records will show which ones are the loafers. There are three record keeping systems available to dairymen in this county — Weigh-A-Day-A-Month, Owner-Sampler and Dairy Herd Improvement Association. For more information on any or all of the three phases call or drop by my office.

FUSIFORM ON PINES
Many of you have probably seen the spindle shaped swellings on branches and stems of pine trees. In early spring, these swellings or cankers are covered with blisters filled with orange powder. They are caused by a fungus commonly called Southern Fusiform Rust, Canker Rust, Fusiform Canker, or simply Fusiform Rust.

This fungus disease strikes hardest on slash and loblolly pines. It attacks longleaf pines to some extent and sometimes is found on shortleaf pines. This rust causes woodland owners to lose thousands of dollars each year. Infected trees may die, but probably the most important loss is due to the degrading effect the fungus has on products cut from a diseased tree. Trees with stem cankers are unsuitable for poles or piling. Much waste occurs in cutting lumber and other products from them.

One of the most interesting things about Fusiform rust is that it requires oak trees for its life development. The orange powder substance which appears on the cankers in the spring is a mass of spores. These spores are carried by the wind to the leaves of oak trees where spores capable of infecting pines are produced. Spores are released from the oaks in late spring and are carried by the wind to new pine needles and branch tips where, upon germination, the fungus grows, attacking the living inner bark. This entire cycle takes place within only a few months. Germination of these spores is perpetuated by a cool moist spring following a mild winter.

By observing certain precautions those of you who have pine stands on the farm or only a few trees around the home, can keep Fusiform Rust infections to a minimum. Early thinning of young stands will reduce losses from the rust. Badly infected trees can be removed by thinning. Pruning of limbs cankers which are within eighteen inches of the stem will save many infected trees. In nurseries, Fusiform infection is prevented by weekly spraying with fungicides.

If you have a problem with Fusiform Rust on your pines, the information contained in the Agricultural Extension Service Circular 440, "Southern Fusiform Rust in Pine Stands," will help you. This circular was written by Harold Baxter, Extension forestry marketing specialist, and George W. Walker, Extension forester. Copies are available free at the county agent's office.

Grains Under Support Price

More wheat, grain sorghums, and soybeans are moving under price support from the 1958 crop than in any other year of the price support program, according to a Department of Agriculture report received at the Bulloch Agricultural Stabilization and Conservation office.

Through November 30, 1958, the report shows, producers had put more than 472 million bushels of 1958-crop wheat under loans and purchase agreements. This is substantially higher than the mid-December total of 451 million bushels in the previous record year, 1953-54.

As of the same date, new crop grain sorghums under support totaled slightly over 67 million bushels.

Supreme Court decision of May 17, 1954, and subsequent rulings, on the other hand, have denied 17 so-called Southern States the same right.

All of which has divided the constitutionally-equal states of the Union into three unequal classes—12 possessing exclusive control over their public schools by act of Congress, 17 denied exclusive control over their public schools by decree of the Supreme Court and 21 in the middle not knowing where they stand.

THE ARGUMENT is made that the Congressional grants of authority must give way to the decrees of the Supreme Court. That theory is convincingly challenged by the constitutional facts that it is Congress, not the Supreme Court, which is specifically authorized to implement the 14th Amendment and that because statehood acts must be ratified by the residents of the territories concerned they are in effect treaties between the United States and the people of the territories concerned and, as such, hold status under the Constitution as the "supreme law of the land."

It is the purpose of the constitutional amendment which right of my colleagues and I have proposed to remedy this situation by writing into the Constitution an explicit guarantee of their right of states to perpetual and exclusive control over their public school systems. In that way the authority for local control of education would become both the express and the implied law of the land.

Just by looking at a cow. Most dairy herds have a few cows that are not paying their way. Records will show which ones are the loafers. There are three record keeping systems available to dairymen in this county — Weigh-A-Day-A-Month, Owner-Sampler and Dairy Herd Improvement Association. Soil-Water Conservation

By E. T. (Red) Mullis

Last week a very busy week for us here in Bulloch County. Two days were taken up with a farm planning training school for Soil Conservation Service personnel in the Ogeechee River and Briar Creek Soil Conservation Districts. This training meeting was held at the Port of Call building and on Denver Lanier's farm near Port.

The purpose of the meeting of course, was to bring the technicians up-to-date on the latest soil and water conservation methods so that they, the farmer, might be better served. We had people from all over the State who are specialists in their respective fields of soil and water conservation to guide us. We had Horace Morgan, Soil Conservationist from Athens; Dr. Roy A. Grizzle, Biological Conservationist from Milledgeville; Jack Brown, Soil Scientist from Statesboro; John Jackson, Agricultural Engineer from Statesboro; J. C. Tillman, Assistant State Conservationist from

Athens; and of course, T. H. Browne, Area Conservationist, in charge. I would like to express appreciation to those who contributed materially to the success of this two day meeting. First, to Mr. Denver Lanier for letting us use part of his farm as a "guinea pig"; next to Mr. Billy Brown, Vice-Principal of Port for "giving us his building; and to Mr. Parker, Principal of Port High for assisting in planning the meeting and meeting place; and to Mayor J. E. Parrish and the City of Port for their great hospitality (and good food at John's Cafe). I can't just say, "Thanks to all of you."

MISS JUDY NESMITH IS ELECTED AREA CHAIRMAN

Miss Judy Nesmith, daughter of Mr. and Mrs. Walton Nesmith of Nevis, was elected chairman of the Fellowship Program Area of the Savannah District Methodist Youth Fellowship Saturday in the Youth Rally and Christian Vacation Conference held at the First Methodist Church at Pembroke.

Miss Nesmith was accompanied to Pembroke by Miss Maude White, counselor and Miss Sandra Nesmith, president of the Nevis MYF. The Bulloch County Sub-District will be represented on the executive board of the Savannah District by two members, Misses Judy Nesmith and Anne Cromley from Brooklet.

If the residents of Statesboro don't care to trade at home, nobody else will either about it.

MR. LIVESTOCK GROWER!

Here are the prices paid last week at Parker's Stockyard at Statesboro - the Stockyard that makes prices and others try to follow

We ask that you compare prices and you can see Parker's Stockyard has increased their percentage to over 99% on top prices for your No. 1 Hogs and for your cattle you get from \$1.00 to \$5.00 per hundred more. Why? More and better buyers and livestock men who know their worth. Remember "You can't do better - you might do worse!"
